Climate Dynamics (1992) 8:55–69

The color bar and the associated contour interval identification were inadvertently omitted from Fig. 12 of the above article. The color bar and the revised figure caption are printed below.

Fig. 12. **a** Distribution of the change in annually-averaged near surface temperature for the final decade (years 91–100) of the Scenario A integration relative to the initial state (averaged over years 1–10) of the control run (contour interval: 1K); **b** EOF 1 of the annually-averaged near surface temperature changes for Scenario A. The explained variance is 84.1% (contour interval:

1×10^{-2}); **c** EOF 2 of the annually-averaged near surface temperature changes for Scenario A. The explained variance is 3.1% (contour interval: 1×10^{-2}); **d** EOF 1 of the annually-averaged near surface temperature changes for the control run. The explained variance is 52.5% (contour interval: 1×10^{-2})
