Phys. Chem. Minerals (1993) 20:228–241

Energy and Long-Range Disorder in Simple Spinels

Antonio Della Giusta¹ and Giulio Ottonello²

¹ Dipartimento di Mineralogia e Petrologia, Università di Padova, Corso Garibaldi 37, I-35100 Padova, Italy

² Dipartimento di Scienze della Terra, Università di Cagliari, Via Trentino 51, I-07100 Cagliari, Italy

p. 229: Equation (14) should read:

$$U_v = f\left(\frac{T}{\theta_c}\right)$$

p. 237 right column, lines 16 and 20 from top:

Replace δU by δu .

p. 238: Equation (27) should read:

$$Cp = Cp_c + Cp_v$$

Equation (28) should read:

$$Sc_{(T)} - Sc_{(T_r)} = \int_{T_r}^T (K1_c + K2_c T + K3_c T^{-2}) \frac{dT}{T}$$

Equation (30) should read:

$$\Delta G_{C(T-T_r)} = \int_{T_r}^T Cp_c dT - T \int_{T_r}^T Cp_c \frac{dT}{T}$$

p. 240: Equation (A2) should read:

$$\Delta_o = \frac{e\mu_d a^4}{\bar{D}_{\lambda,j}^5} = \frac{e z a^4}{\bar{D}_{i,j}^5}$$
