Polymorphisms of the Prion Protein gene in Italian patients with Creutzfeldt-Jakob disease

Hum Genet (1994) 94:375–379

In the above article there was a mistake in Table 1 on p. 376. The frequencies of Met/Val heterozygous and Val/Val homozygous controls were interchanged. The entire table is correctly printed below.

Table 1 Genotype frequencies at codon 129 in CJD patients and controls

	<i>n</i>	Codon 129		
		Met/Met	Val/Val	Met/Val
Definite CJD	29	23 (79.31)	1 (3.45)	5 (17.24)
Probable CJD	2	2	–	–
Total CJD	31	25 (80.64)	1 (3.23)	5 (16.13)
Controls	186	84 (45.16)	27 (14.52)	75 (40.32)
