Contrib Mineral Petrol (1991) 109:212–224

We have become aware of an error in our recent paper. The empirical coefficients calculated for Fe partition coefficients between olivine or orthopyroxene and melts in Tables 1 and 2 are incorrect and should read as follows:

Table 1. Olivine/melt partition coefficients

Element	A	B	n	r	σ
Fe	0.299	0.027	898	0.93	0.132

Table 2. Orthopyroxene/melt partition coefficients

Element	A	B	n	r	σ
Fe	0.264	0.129	146	0.91	0.264

This error does not affect any of the other data or the conclusions of this paper.
