Leaf and canopy responses to elevated CO₂ in a pine forest under free-air CO₂ enrichment

Oecologia (1995) 104:139–146

The photosynthetic parameters of *Pinus taeda* foliage originally presented in Table 2 were shown with incorrect units. The units for A_{net} (at $C_a=350$ and $550 \mu\text{mol mol}^{-1}$), A_{sat} and $V_{\text{c}_{\text{max}}}$ should be $\mu\text{mol CO}_2 \text{ m}^{-2} \text{ s}^{-1}$. The units shown in all of the original figures were correct. We sincerely regret any confusion that may have arisen over this.
