Erratum

Neuroradiology (1987) 29: 374-379

CT diagnosis of lumbosacral conjoined nerve roots

Findings in 19 cases

P. Torricelli¹, V. Spina², and C. Martinelli¹

¹ Institute of Radiology, University of Modena, Modena, Italy

² Department of Radiology, Hospital of Sassuolo, Sassuolo (Modena), Italy

The first sentence in the last paragraph of the Results section (page 377) should have read: "In 2 cases, associated with lateral recess stenosis, we could only see the absence of epidural fat at the pedicle level but we could not distinguish the single anomalous roots."
