Received: 26 August 1992

On page 509 of the paper starting on page 508 of Volume 23 there were unfortunately several errors in Fig. 1. The figure is reprinted below.

Fig. 1. pAN7-1 hybridization pattern in randomly selected 2457 × 2512 parasexual progeny. *Hind*III-digested genomic DNAs were blotted and probed with linearised pAN7-1. Lane 1, strain 2512; lane 2, strain 2457; lanes 3, 5, 6, 7, 9, and 12, hygromycin-resistant progeny; lanes 4, 8, 10, 11, and 13, hygromycin-sensitive progeny. Approximate sizes are given in kb. Open circles, novel size bands
