“Regular Arrays of Intramembranous Particles in the Plasmalemma of Guard Cell and Mesophyll Cell Protoplasts of *Vicia faba*”

H. Schnabl, J. Vienken, and U. Zimmermann

During the galley-proof reading procedure mistakes in type-setting have not been considered by the journal. The most important and possibly misleading are:

p. 231: key words: Intramembranous particles

p. 232: Fig.: 1: The diameter of the cell suspension droplet (CD) is: ≤ 0.3 mm

p. 237: References: The following reference has to be added: Chalcroft, J.P., Bullivant, S.: An interpretation of liver cell membrane junction structure based on observation of freeze-fracture replicas of both sides of the fracture. J. Cell Biol. **47**, 49–60 (1970)
