Corrigendum

The paper in *Planta* **94**, 319–332 (1970) by F. W. Bentrup lacks adequate reference to the pertinent work of M. H. Weisenseel. Instead of quoting a “persönliche Mitteilung” (p. 326), I regrettably forgot to cite the paper by M. H. Weisenseel and L. F. Jaffe: The membrane potential of developing eggs of the Fucaceous alga, *Pelvetia fastigiata*. Abstr. XI. Internatl. Botan. Congr. (Seattle) 1969. I would like to add that a further part of Dr. Weisenseel’s work has been published in the paper of L. F. Jaffe: On the centripetal course of development, the *Fucus* egg, and self-electrophoresis. Develop. Biol. Suppl. **3**, 83–111 (1969) which appeared while my paper was in press.
