Erratum

R. Stein-Werblowsky: "The Haematogenous Spread of Tumor: A Prevental Process"

J Cancer Res Clin Oncol (1983) 105:158–161

P. 158: The title should read "...of Tumor: A *Preventable* Process. P. 159, § 3 should read: „*Lodgement in the Venules*. Non-metastasizing tumor was injected into the thigh of 20 rats. The tumor bearing limbs were disarticulated 7 days later. One animal died. Ten

animals received three IM injections of 4.0 ml trypsin solution on the 3 days following amputation. Among the ten trypsin treated rats, there were eight animals with pulmonary tumors and 7 with lymphatic involvement. In the control group, there were two animals with pulmonary tumors and none with lymphatic involvement. These two animals had amputation stumps that had gone septic. The animals with healthy stumps were free of tumor."
