**ADDENDUM TO 'CONSTRUCTION OF POSITION AND MOMENTUM
OPERATORS AND HAMILTONIANS BY EMBEDDING AND SUBMERSION'**

Letters in Mathematical Physics 6, 183–188 (1982)

This paper was taken completely, with some minor changes, from a longer, unpublished manuscript with the title 'Quantisation by Embedding and Submersion', written in 1976/77 by H. D. DOEBNER, International Centre for Theoretical Physics, Trieste, Italy, and J. TOLAR, Faculty of Nuclear Science and Physical Engineering, Czech Technical University, Prague, C.S.S.R. I myself (H. P. Berg) submitted this paper for publication, but I was not the author. The authors were H. D. DOEBNER and J. TOLAR.

I regret that such an addendum is necessary.
