Pulmonary O₂ Diffusing Capacity at Exercise by a Modified Rebreathing Method

A. Veicsteinas, H. Magnussen, M. Meyer, and P. Cerretelli

Europ. J. appl. Physiol. **35**, 79–88 (1976)

Equation (6) on p. 84 must read:

$$\text{S.E.}_{v_{\text{O}_2}} = \sqrt{\frac{\left(\frac{\delta D_{\text{O}_2}}{\delta \dot{Q}}\right)^2 \cdot s_{\dot{Q}}^2 + \left(\frac{\delta D_{\text{O}_2}}{\delta \beta_{\text{O}_2}}\right)^2 \cdot s_{\beta_{\text{O}_2}}^2 + \left(\frac{\delta D_{\text{O}_2}}{\delta k_{\text{O}_2}}\right)^2 \cdot s_{k_{\text{O}_2}}^2 + \left(\frac{\delta D_{\text{O}_2}}{\delta V_A}\right)^2 \cdot s_{V_A}^2 + \left(\frac{\delta D_{\text{O}_2}}{\delta F}\right)^2 \cdot s_F^2}{n}} \quad (6)$$
