Psychopharmacology (1988) 95: 520–527

Antidepressants and human memory: an investigation of four drugs with different sedative and anticholinergic profiles

H. Valerie Curran, Mingquan Sakulsriprong, and Malcolm Lader

Department of Psychiatry, Institute of Psychiatry, De Crespigny Park, London SE5 8AF, UK

Change scores depicted in Fig. 1 are inaccurate – correct means for free recall are given in the adjacent Table 3.

Table 3 contains 2 errors: column 13, line 4 should be 25.7 not 15.7; column 5 line 11 should be 4.1 not 41. Figure 4a depicts mean number of lines of letters cancelled and Fig. 4d depicts means for correct responses in the reaction time task.
