Erratum

Open-field Behaviour in Sheep following Treatment with the Neuroleptics Azaperone and Acetylpromazine

R. N. HUGHES, L. A. SYME, and G. J. SYME

Psychopharmacology **52**, 107–109 (1977)

On page 108, right column, line 14 should read:

. . . it was necessary to combine data from the drug conditions to produce a saline ($N=8$) and one drug group ($N=16$) for each compound separately.
