Z. Wahrscheinlichkeitstheorie verw. Geb. 11, 82 (1968)

Correction to
An Integral Equation Arising from Markov Chains

Z. Wahrscheinlichkeitstheorie verw. Geb. 8, 298–300 (1967)

H. P. McKEAN, JR.

Received September 2, 1968

P. A. MEYER [private communication] has kindly pointed out a gap in the jump from formula (10) to formula (11) on p. 299. At that place some domination is needed to interchange $\lim_{f \uparrow 1}$ and $\int_{0+}^b dp$, which I have not been able to supply.

The proof is thereform incomplete, though I still believe formula (6) to be correct.
