A. S. Sharov and V. M. Lyuty: 'Photoelectric Catalogue of Globular Clusters in the Andromeda Nebula M31 and Its Companions NGC 147, NGC 185, and NGC 205', *Astrophys. Space Sci.* **90**, 371-384 (1983).

The globular cluster KP 314 and M31 mentioned in our paper was not observed. In fact, the published data belong to KP 315. The mean UBV values for KP 315 based on all observations ($n=5$) are: $V=15.68$, $B-V=0.85$, $U-B=0.26$. It is necessary to change also the number of clusters in M31 with UBV observations per one object. We sincerely regret this error.
