In vitro characterization of the myelotoxicity of cyclopentenyl cytosine

In: Cancer Chemotherapy and Pharmacology (1994) 34: 103–108

On page 105 of the above contribution the legend to Fig. 3 contains an error in line 2 (CFU-gm should read CFU-e). The complete legend is as follows:

Fig. 3. Effects of CPE-C exposure on human (●—●) and murine (■---■) CFU-e. Symbols represent mean values $\pm$ SE for 3 individual experiments; lines were generated from the Emax equation. Each experiment consisted of 6 capillaries (human) or 3 dishes (murine)
