Erratum

Dicarboxylic acid transport in *Rhizobium meliloti*: isolation of mutants and cloning of dicarboxylic acid transport genes

Eugene Bolton, Brian Higgisson, Aiden Harrington, and Fergal O’Gara

Arch Microbiol (1986) 144:142–146

The authors wish to modify the text to express DNA fragment sizes in kilobases. The sizes were inadvertently listed incorrectly in megadaltons. We regret the oversight.

Page 145, column 1, paragraph 3, lines 11–16 should read:

These plasmids (pRK 290:4:46 and pRK 290:5:11) contained a 40 kb insert consisting of five *Bgl*III fragments (16.60, 8.70, 7.60, 5.90 and 1.20 kb in size). These plasmids contain 7 *Bam*HI sites (fragment sizes are 25.85, 14.15, 7.90, 4.55, 3.55, 2.90 and 1.10 kb), 4 *Cla*I sites (fragment sizes are 36.40, 13.40, 6.75 and 3.45 kb) and 7 *Eco*RI sites (fragment sizes are 21.55, 12.45, 6.15, 5.50, 3.20, 1.55 and 1.45 kb).

Also the size markers for Fig. 2 should be as follows:

19.00, 9.35, 5.75, 5.25, 3.75, 2.30 and 1.20 kb.
