Erratum

In the paper "A $\overline{\text{Poincaré}}$ Gauge Theory of Gravity" (*Gen. Rel. Grav.* **18**, 995), the following corrections should be made:

- (i) In the sentence "The reduction of $\mathcal{P}$ to... are discussed." from the last line of the text on p. 996 to the first of the next page, commas should be deleted.
- (ii) In (2-5), (2-30), and the second equation of (5-34), $=$ should be $\stackrel{\text{def}}{=}$.
- (iii) The symbol $\tilde{\Xi}$ in the line below the title of subsubsection (2.C.1) should be $\tilde{\Sigma}$.
- (iv) In (2-15), $\nabla \times \tilde{\Sigma}$ should be $\nabla_X \tilde{\Sigma}$.
- (v) At the end of the sixth line of p. 1002, $:$ should be placed.
- (vi) In the second line of p. 1007, $\psi \tilde{\Sigma}_{kl}{}^\mu$ should be $\psi \tilde{\Sigma}_{kl}{}^\mu$.
- (vii) The index μ of $E_k{}^M{}^\mu$ and of $E_k{}^G{}^\mu$ on p. 1010 should be deleted.
- (viii) In (5-25b)', ${}^G\mathbb{R}_{mnl}$ should be ${}^G\mathbb{R}_{mnl}$.
- (ix) Next to (5-35b), $h \stackrel{\text{def}}{=} [-\det(g_{\mu\nu})]^{1/2}$ (5-35c) should be inserted.
- (x) The symbol $\equiv$ in (5-39) should be $=$.
- (xi) The comma on the right-hand side of (5-43) should be deleted.
- (xii) The symbol $]$ on the right-hand side of (A-5) should be deleted.

Also, we state that (6-5) and (6-6) hold true when (2-24) is satisfied. In the general case for which (2-24) is not necessarily satisfied, however, there should be the additional term $-\psi_{[k} \partial \mathbb{I} / \partial \psi^{I]}{}_{,\mu}$ on the right-hand side of (6-5) and in the bracket in the left-hand side of (6-6).

ACKNOWLEDGMENT

The author wishes to thank T. Fukui for pointing out the errors mentioned in the above (vi)–(ix).
