Eur J Nucl Med (1996) 23: 18–24

Because of an unfortunate printing error, some of the mathematical symbols were omitted in Eq. 1 on p. 19 of the above article. Equation 1 is reprinted below:

$$K \left(\sum_{i=1}^{12} [\text{DY} \cdot \text{scn}] \right) + [\text{TR} \cdot \text{scn}] = [\text{TRDY} \cdot \text{scn}]$$
