Appl. Phys. **19**, 295–305 (1979)

Equation (18) should read

$$\sqrt{\varepsilon} 2A \left(\frac{\beta_c}{2\gamma} \right)^{1/2} \left[1 + \frac{L}{2} \cdot \left(\frac{\gamma_c}{\beta_c} \right)^{1/2} \right] + \varepsilon \frac{\gamma^2 \gamma_c}{2\pi K^2} \ll \frac{1 + K^2}{2K^2 N}.$$
