ERRATUM

Fernandez, E. (1990). Artifact in pain ratings, its implications for test-retest reliability, and correction by a new scaling procedure. *Journal of Psychopathology and Behavioral Assessment*, 12, 1-15).

On p. 5, the formula should read:

$$CT_{\text{int}} = CT_{\text{ll}} + \frac{(TR_{\text{int}} - TR_{\text{ll}})}{(TR_{\text{ul}} - TR_{\text{ll}})} (CT_{\text{ul}} - CT_{\text{ll}}),$$

where *CT* refers to cumulative time, *TR* refers to transformed ratings, and the subscripts int, ll, and ul refer to interpolated value, lower limit, and upper limit, respectively.
