CORRECTIONS TO THE ARTICLE "MULTIDIMENSIONAL
SINGULAR INTEGRALS IN CLASSES OF GENERAL LEADING
MODULES OF SMOOTHNESS" (Sib. Matem. Zh., 9, 4, 690-696 (1968))

L. O. Rode and I. B. Simonenko

In the paper entitled "Multidimensional Singular Integrals in Classes of General Leading Modules of Smoothness" (Vol. 9, No. 4) we discovered several misprints which we are to blame for.

- 1) On page 930, formulating the fundamental theorem, the condition given must read $\beta \in (0, n]$.
- 2) On page 691, line 11 from above, in the denominator of the integrand $\tau - 1$ must be replaced by $\tau - t$.
- 3) On page 693 on the right-hand sides of the inequalities in lines 16 and 21 from above, and in Eq. (3.2) on p. 692, the factor $\varphi(x)$ was omitted.
- 4) The last paragraph of the paper should be replaced by the following: "Note that the factor $\varphi_1(x)$ is only used in estimates with respect to the range D_2 ."

Moreover, in connection with the investigations by N. M. Mikhailova-Gubenko into the singular integrals in Holderian spaces, it should be mentioned that in this case our requirements and the requirements of this paper are intersecting. A comparison shows that the conditions for the characteristics in both papers are not necessary.

Translated from Sibirskii Matematicheskii Zhurnal, Vol. 11, No. 3, p. 712, May-June, 1970.
