ERRATUM

Barker, J. C. 1989 Health and Functional Status of the Elderly in a Polynesian Population. *Journal of Cross-Cultural Gerontology* 4: 163-194.

Due to an oversight, the original version of Table I contained an error. The corrected Table I is printed below. Changes in the text should be made in two places. On p. 174 in the first paragraph text should read: "Just over half the respondents (55%, n=35) lived with two or more people. Nine (14%) older people lived on their own while another 19 (30%) lived with just one other person." On p. 175, at the beginning of second paragraph, the text should read "Nineteen respondents (30%) ...". These corrections do not change any of the conclusions drawn in the report. All other information in this article is correct.

TABLE I
Kin relationships and household composition

Older person lives alone	9	(14%)
Lives with one other	19	(30%)
Spouse	9	
Child	5	
Other	5	
Lives with more than one other	35	(55%)
Spouse + child(ren) + g'child(ren)	16	
Child(ren) + Grandchild(ren)	10	
Grandchild(ren) + their child(ren)	7	
Other Relative	2	
	63	(100%)
