ERRATA

It has been brought to our attention that during the printing of Journal of Nonverbal Behavior, Volume 5 Number 1 several serious mistakes were made. Drs. David E. Smith, Frank N. Willis and Joseph A. Gier's tables appeared, erroneously, in Dr. Chris L. Kleinke's article. Unfortunately, Dr. Kleinke's tables were omitted entirely and following are reprinted in full with our apologies.

Also omitted was the table in Drs. Paul E. Greenbaum and Howard M. Rosenfeld's article. It, too, is reprinted here with our sincere apologies for any inconvenience.

Corrected reprints may be obtained from the authors.

Interaction Between Gaze and Legitimacy of Request on Compliance in a Field Setting

Dr. Chris L. Kleinke

Table 1

Experiment 1

Percentage of Subjects Complying

	Gaze	No-Gaze
Legitimate		
Request	88.4%	64.4%
(phone call)	(44)	(45)
Illegitimate		
Request	41%	45%
(candy bar)	(39)	(40)

Note. Number of subjects is in parentheses.

Table 2

Experiment 2

Percentage of Subjects Complying

	Gaze and Touch	Gaze No-Touch	No-Gaze No-Touch
Legitimate	73.7%	78.9%	27.8%
Request (phone call)	(19)	(19)	(18)
Illegitimate	31.6%	26.3%	55.0%
Request (gum)	(19)	(19)	(20)

Note. Number of subjects is in parentheses.

Table 3

Experiment 2

Percentage of Subjects Complying

	Gaze and Touch	Gaze No-Touch	No-Gaze No-Touch
Male	78.9%	66.7%	26.3%
Subjects	(19)	(18)	(19)
Female	26.3%	40.0%	52.6%
Subjects	(19)	(20)	(19)

Note. Number of subjects is in parentheses.

Varieties of Touching in Greetings: Sequential Structure and Sex-Related Differences

Drs. Paul E. Greenbaum and Howard M. Rosenfeld

Table 1
Relative Frequency of Greeting Components as a Function
of Temporal Locus, Size of Cluster, and Sex-typed Dyad

Behavior Component	(N)	Relative Frequency	Position in Cluster		Cluster Size			Sex of (traveler/greeter)			
			Initial	Terminal	1	2	3-4	M/M	M/F	F/M	F/F
Hand-to-upper-body	(57)	45.2	25	<	68	14<	(46 40)	35	42	42	59
Embrace	(49)	38.9	51		55	12<	(39 49)	11<	(46 31)		62)
Mutual-lip-kiss	(41)	32.5	80	>	46	32<	49 >20	4<	(38 53)		30)
Handshake	(28)	22.2	96	>	64	61>	36 > 3	78>	(15 8)		0)
Mutual-face-contact	(22)	17.5	32		32	5<	(41 55)	7	15	14	30
Face-kiss	(21)	16.7	81	>	33	19<	(57 >24	7	23	19	16
Handhold	(8)	6.3	50		75	25 75	00	4	8	8	5

Note. "<" and ">" refer to directions of significant differences ($p < .05$) for adjacent items, or for each item separated by parentheses. The relative frequency of the components refers to the percent of total greeting events that were in a given category. Temporal-locus and cluster-size relative frequencies show the percent of total component occurrences that were in these categories. Sex-type relative frequencies refer to percent of occurrences within a given sex-type. Among the sex-type columns, only tests of male/male dyads versus dyads containing a female are shown.
