Errata

The signs in the Emotional Independence Subhierarchy of Figure 3 on p. 270 of the Royce/Diamond paper (i.e., A multifactor-system dynamics theory of emotion. *Motivation and Emotion*, 1980, 4, 263-298) and in Figure 1 on p. 196 of the Royce/McDermott paper (i.e., A multidimensional system dynamics model of affect, *Motivation and Emotion*, 1977, 1, 193-224) on affect were erroneously reversed in preparation by the authors. The correct version is indicated as follows:

In words, the sign between Emotional Independence and Cortertia should be a plus, the sign between Cortertia and Realism should be a plus, and the

signs between Cortertia and Tendermindedness and Affectothymia should each be a minus. Finally, the sign between autonomy and realism should also be a plus.
