A note on calculating Condorcet probabilities, Corrigendum

PATRICK A. McNUTT

Department of Economics, University College, Galway, Ireland

Corrigendum

In the article, McNutt (1993: 359), z represents $(n + 1)/2$ and not $(n - 1)/2$ as stated.

The author inadvertently changed $(n + 1)/2$ to $(n - 1)/2$.

A discussion of the proof is contained in Borooah and McNutt (1993) due for publication later this year.
