Erratum

Some Suggestions for Measuring Predictive Performance

Lewis B. Sheiner¹ and Stuart L. Beal¹

Received December 15, 1981

Several changes made in the proof copies of this paper (Vol. 9, No. 4, 1981, pp. 503–512), were not implemented in the final published version. We here call our readers' attention to the most serious of these:

1. Equation (1) should read:

$$mse = \frac{1}{N} \sum_{i=1}^N pe_i^2; \quad rmse = \sqrt{mse}$$

2. Three lines below Eq. (3), p. 507, delete phrase beginning "and is invariant . . ." to end of paragraph.
3. Equation (9) should read:

$$se_{\Delta me} = \left[\frac{1}{N(N-1)} \sum_{i=1}^N [[pe_{1i} - pe_{2i}] - \Delta me]^2 \right]^{1/2}$$

4. Table II: the third line of numbers should read: $-5.7(-12.0, 0.5)$.
