ERRATUM

In the article, "The Effect of Fatty Acid Perfusion on Intestinal Alkaline Phosphatase: I. Studies on Man," by William G. Linscheer, Juan-R. Malagelada, Leo L. Stolbach, and William H. Fishman

(Am J Dig Dis 22:509-515), Figure 2 was inadvertently printed in black and white, rather than in color. The figure should appear as shown below.

Fig 2. Alkaline phosphatase activity (in brown) before (A) and after perfusion of oleic acid solution (B). The orange color (Sudan IV stain) represents absorbed lipids. The alkaline phosphatase activity appears at the same locations as the absorbed lipid being transported by mucosal lymphatics.
