Erratum

Maria De Fino, L. La Volpe, and G. Piccarreta: "Mafic Minerals from Punta delle Pietre Nere Subvolcanites (Gargano, Southern Italy): Their Petrological Significance". *Tschermaks Min. Petr. Mitt.* 32, 69–78 (1983).

Page 75, lines 1, 2, and 3 from above should read $K_D = \frac{\text{Fe}''}{\text{Mg}} \text{ ol} / \frac{\text{Fe}''}{\text{Mg}} \text{ liquid} = 0.30$ (Roeder and Emslie, 1970), it is possible to calculate the $\text{Mg}/(\text{Mg} + \text{Fe}'')$ (atoms) ratio for the liquid from which a given olivine crystallized.

Page 76, Table 3 should read

	MG1	MG2	UM1	UM2	UM3	UM4	CHM1	CHM2	CHM3
