ERRATA

V. Dlab noted that the example of a local β -ring that is not an α -ring, appearing on page 625 of my paper, "Two Properties of Associative Rings" [Mathematical Notes, 2, No. 3, pp. 623-626 (1967)], was incorrect since, in fact, this ring contains two maximal two-sided ideals, $\{0, a, b, d\}$ and $\{0, b, c, e\}$. I wish to thank Professor Dlab for having called attention to the error.
