ERRATA

In V. G. Pokotilo's article "Optimal experiment designs in guaranteed-estimation problems, II," in *Cybernetics and Systems Analysis*, Vol. 29, No. 1, pp. 61-67, 1993:

1. The letter **U** (Gothic U) for the set of permissible meters should be replaced by **A** (Gothic A).

In V. G. Pokotilo's article "Optimal experiment designs in guaranteed-estimation problems, III," in *Cybernetics and Systems Analysis*, Vol. 29, No. 4, pp. 54-62, 1993:

Everywhere, with the exception of the three cases noted below, the letter **W** (Gothic W) should be replaced by **V** (Gothic V), which is used to denote the set of permissible perturbations in the entire article. The letter **W** itself is correctly used on Russian pages 59-60 (pp. 518-519 in the English translation), but only in the following combinations:

$W_0 = R^0 \times V$ is an initial set of permissible pairs (x, v) in space $W = R^n \times B$.

$W(y)$ is an information set that is compatible with signal y (see Definition 3.1).

W_τ is a set of pairs (x, v) that are compatible with the information at time τ .
