Erratum

The gauge theorem for a class of additive functionals of zero energy

Joseph Glover, Murali Rao, Renming Song

Department of Mathematics, University of Florida, Gainesville, FL 32611, USA

Probab. Theory Relat. Fields 97, 195-210 (1993)

K.L. Chung initiated the study of gauge theorem for Brownian motion in R^1 in [1]. K.L. Chung and M. Rao then studied the gauge theorem for Brownian motion in R^d , $d \geq 2$ in [2]. These comments correct an historical misstatement in the introduction to the article.
