ERRATA

A. UNTERBERGER and J. UNTERBERGER

Representations of $SL(2, \mathbb{R})$ and symbolic calculi

Integr. Equat. Oper. Th. vol. 18 (1994), p. 303-334.

The following corrections should be made in the above paper.

The two basic formulas in definition 4.1 on p. 315 should read

$$(0p_0(f)u)(s) = c_{-\lambda} \int f(s, t) |s - t|^{-1} \chi(s - t) (\theta u)(t) dt ,$$

$$(\theta 0p_1(f)u)(s) = c_{\lambda} \int f(t, s) |s - t|^{-1} (\chi(s - t))^{-1} u(t) dt .$$

In theorem 4.5, on p. 319 a minus sign has been omitted in front of the right-hand side of the formula for F^{odd} .

THE JOURNAL OF DIFFERENCE EQUATIONS AND APPLICATIONS

Editor in Chief

Saber Elaydi, Trinity University, Texas, USA

This new journal presents state-of-the-art papers in difference equations and the theoretical and applied problems in which they arise. Topics include theory and applications of difference equations in combinatorics, mathematical biology, chaos theory, non-linear dynamics, numerical simulation of complex systems, game theory, oscillation theory, discrete control in engineering, computational linear algebra, and other fields and specialties.

INTEGRAL TRANSFORMS AND SPECIAL FUNCTIONS

An International Journal

Editor in Chief

A.P. Prudnikov, Russian Academy of Sciences, Moscow

Integral Transforms and Special Functions is the only journal devoted to these topics. Although centuries old, they are under intensive development for use in pure and applied mathematics, physics, engineering and computer science. Indeed, the journal is the central source of information for anyone making use of mathematical analysis, differential and integral equations, and approximation theory. The aim of *Integral Transforms and Special Functions* is to foster further growth by providing a journal for the publication of important research on all aspects of these subjects.
