Erratum

A recent article authored by Alan E. Kazdin and David J. Kolko ("Parent psychopathology and family functioning among childhood firesetters," 1986, 14, 315-329) reported two F values incorrectly. On page 323, the sentence beginning on line 7 (A two-way analysis of variance. . .) needs to be corrected. The Firesetting Status $\times$ Conduct Disorder analysis yielded a significant effect for Firesetting Status, ($F(1,47) = 9.42, p < .01$) but no effect for Conduct Disorder ($F = 1.66$). Thus, mothers of firesetters were more depressed than mothers of nonfiresetters, as noted in the article. However, mothers of conduct disordered and nonconduct disordered children did not differ significantly in their depression.
