Corrigenda to

A note on the translation of a thin rod inside a cylinder

Rheol. Acta 26: 266–271 (1987)

O. Manero, B. Mena and L. de Vargas

Instituto de Investigaciones en Materiales, Departamento de Polimeros, UNAM, México

Eq. (10) should read

$$C_D = \frac{\tau_i}{\frac{1}{2}\rho U^2}.$$

Eq. (14) should read

$$\tau_i = m \left(\frac{1-n}{n} \right) \frac{U/R_i}{1 - k \frac{1-n}{n}} \Bigg]^n.$$

In eq. (15) the Reynolds number Re is defined as:

$$Re = \frac{2R_i \rho U}{m \left[\frac{1-n}{n} \frac{U/R_i}{1 - k \frac{1-n}{n}} \right]^{n-1}}.$$

The authors wish to thank Dr. M. Tachibana of Fukui University in Japan for bringing these errors to our attention.
