Errata

Smooth Non-Bernoulli K -Automorphisms

A. Katok

Department of Mathematics, University of Maryland, College Park, MD, USA

Invent. math. **61**, 291–299 (1980)

The note added in the proof on page 299 does not refer to the paper of A. Katok but to the preprint by M. Brin, number 9 in the list of references. The asterisks were deleted by mistake.

Positivity Notions for Coherent Sheaves over Compact Complex Spaces

Joshua H. Rabinowitz

Department of Mathematics, University of Illinois at Chicago Circle, Chicago, IL 60680, USA

Invent. math. **62**, 79–87 (1980)

The Corollary to Theorem 2 on page 81 should read

Let X be a normal irreducible compact complex space, $\mathcal{S} \rightarrow X$ a primary positive coherent sheaf of generic fiber dimension one. Then $H^k(X, \mathcal{S} \otimes \mathcal{K}) = 0$ for all $k \geq 1$, where $\mathcal{K}$ is the “canonical sheaf” of X .
