Book Review

Staudacher, M.: Akute periphere Gefäßchirurgie. (Acute peripheral vascular surgery.). Wien-New York: Springer-Verlag. 1983. Mit einem Geleitwort von J. Navrátil. 103 farbige Einzeldarstellungen, 14 Schwarzweißabbildungen, XI, 119 Seiten. Gebunden S 686,—, DM 98,—.

This book, which is written in German, gives an informative survey on the acute vascular surgery of peripheral vessels.

A great number of illustrations explain in a very instructive way the different operative situations and procedures.

For the Neurosurgeon the book is only of limited value because it does not deal with the surgery of the cerebrovascular system.

F. Loew, Homburg/Saar

Erratum

In the paper written by K. Moritake, H. Handa, J. Yamashita, J. Takeuchi, W. Taki, Y. Takebe, and T. Konishi on "STA-MCA Anastomosis in Patients with Skull Base Tumours Involving the Internal Carotid Artery — Haemodynamic Assessment by Ultrasonic Doppler Flowmeter", published in *Acta Neurochirurgica* 72, 95—110 (1984) the authors expressed their opinion that this was the first report of STA-MCA anastomosis in cases with brain tumours.

Unfortunately, they had overseen two previous publications of such cases: Gratzl, O., Schmiedek, P., Steinhoff, H., Extra-intracranial arterial bypass in patients with occlusion of cerebral arteries due to trauma and tumour. In: *Microneurosurgery* (Handa, H., ed.), pp. 68—80. Tokyo: Igaku Shoin. 1975. Olteanu-Nerbe, V., Marguth, F., Extracranial-intracranial bypass operation in basal tumours. *Neurosurg. Rev.* 5 (1982), 99—105.

The authors deeply regret their oversight and correct it herewith..
