Correction

In the contribution by M. Okubo, K. Hara, T. Mori "Polymer coatings onto anodized aluminium plate by anodic electrode position from alkali-swollen carboxylated acrylic emulsion", Colloid Polym. Sci. 268:240–244 (1990) Figure 1 was not published. We sincerely apologize for this error. Please see Fig. 1 and its legend below:

Fig. 1. Increases of the relative viscosity of EA-MMA-MAA (45/45/10, mole ratio) terpolymer emulsion (polymer solid, 5 wt %) against deionized water at 25 °C, as a function of alkali-treatment time with DMAE (0.5 eq. ratio per MAA) at 60 °C (○) or 25 °C (●).
