Erratum

BEHNKE, H.-D.: P-Type Sieve-Element Plastids: A Correlative Ultrastructural and Ultra-histochemical Study on the Diversity and Uniformity of a New Reliable Character in Seed Plant Systematics. *Protoplasma* **83**, 91—101 (1975).

Owing to a technical oversight, an incorrect printing block was used to print Table 3, page 98 of the paper. This did not show up all the details of the picture clearly enough. We are therefore repeating the Table in its correct form here and ask you to excuse the mistake.

Table 3. *The Structural Diversity of P-Type Sieve-Element Plastids*

A Classification Using the Morphology of Protein Inclusions				
SUBTYPE	P : C(S)
	P : mdC.S
	P : i-rbF.S
SUBTYPE	P : CF(S)

C = crystalloids, F = filaments, S = starch

b = bundle, c = cuneate, d = drumlike, g = globular, i = irregular,

l = large size, m = minor size, p = polygonal, r = ringlike,

v = variable size
