Erratum

Binding of Concanavalin A to Intact Cells and Spheroplasts of *Anacystis nidulans*

F. S. Hauser and G. A. Peschek

Current Microbiol 7:377–382, 1982

During the production process, an unrevised figure was mistakenly printed above the legend for Fig. 2. To the right is the correct figure as it should have appeared:

Fig. 2. pH Dependence of FITC-ConA binding to *Anacystis nidulans*. Cells were preincubated with 0.05% (wt/vol) CTAB at 22°C and pH 7.0 for 30 min, centrifuged, and washed free of CTAB. Washed cells were incubated, at different pH values, with 10 µg/ml of FITC-ConA at 22°C for 60 min.
