Erratum

Infection 24 (1996) no. 6

Addendum

P. Kempf et al.: “Monopenem Monotherapy versus Cefotaxime plus Metronidazole Combination Treatment for

Serious Intra-Abdominal Infections,” pages 473–479. On page 477, Table 3, a satisfactory clinical response at the end of therapy was achieved in 16/17 patients who had peritonitis due to perforated appendicitis.

Editor's Note

The article published by *N. Hejazi* and *W. Hassler*, “Multiple Intracranial Tuberculomas with Atypical Response to Tuberculostatic Chemotherapy: Literature Review and a Case Report” in *INFECTION* 25 (1997) no. 4, 233–240 was published without our knowledge 2 months earlier in the journal *Acta Neurochirurgica* (Vienna) 139 (April-June 1997) no. 3, 194–202. This was done despite

the fact that it had been revised according to recommendations by our reviewers and edited in English by our editorial office before this date, and the proofs corrected by the author. This article will not be listed in our annual index. Indexing services may delete this article under *INFECTION* from their data banks or add a reference to our editorial note.
