ERRATA

Watson, A. P., and E. L. Etnier. 1981. Health and safety implications of alternative energy technologies. I. Geothermal and biomass. *Environ. Mgmt.* 5:313-327; II. Solar. *Environ. Mgmt.* 5:409-425.

We have noted a minor, but misleading, error in Part I. In column one of Table 7, the entry for transportation WDL under citation *b* should read 0.34-0.62. The decimal was inadvertently left out of the second value. The range of sums at the bottom of the column is correct.

A second point concerns a comment in Part II in which we credit Herbert Inhaber with the first attempt made to analyze risk of a technology considering its entire life span. Since publication of our manuscript, we have realized that this type of comparison was performed earlier at the Jet Propulsion Laboratory (Caputo, R. 1977 *An initial comparative assessment of orbital and terrestrial central power systems*. JPL-900-780. California Institute of

Technology, Pasadena CA) and at the University of California, Berkeley (Smith, Weyant, and Holdren. Group Report ERG 75-5. *Evaluation of conventional power systems*. Energy and Resources 1975). The data base from these reports was drawn upon at length by Inhaber for his assessment (Inhaber, H., *Risk of energy production*. AECB-1119/Rev. 3, 1979). The authors regret this oversight.

Annetta P. Watson

Steiner, F., And K. Brooks. 1981. Ecological planning: A review. *Environ. Mgmt.* 5:495-505.

In the Literature Cited section of this paper, the citation for Leopold 1949 is incorrect. It should read: Leopold, A. 1949. *A Sand County almanac and sketches here and there*. Oxford University Press, New York, NY. 295 pp.

ANNOUNCEMENT

The 8th Tall Timbers Conference on Ecological Animal Control by Habitat Management will be held March 8-9, 1982 in the Hilton Ballroom, Tallahassee, Florida.

The conference will explore the causes of pest outbreaks in agricultural, forest, urban and aquatic eco-

systems, and ways to prevent them by enhancing natural controls through habitat management techniques.

For further information contact Miguel A. Altieri, Division of Biological Control, 1050 San Pablo Ave., University of California, Albany, CA 94706.
