ERRATUM

Calc.Tiss.Res. 2, Suppl. (1968), G.A. Charbon, Abstract Nr 73

Line 26 should read:

$y = 0.46x - 2.61$. The standard error of mean (S.E.) for x at ED_{50} was 0.19. The regression equation for the second curve was $y = 0.41x - 2.41$; S.E. at ED_{50} : 0.42. ($x = 0$ at 0.1 ug; $x = 2 \log \text{dose}$) (fig.1).
