Z. Phys. A – Atoms and Nuclei 312, 89–93 (1983)

In the coupling constants listed in the paper the factor of 60 was missing. Their values should be:

$$v_{l=1} = (660 + 240i) \text{ MeV} \quad \text{and} \\ v_{l=3} = (6600 + 4500i) \text{ MeV}.$$
