ERRATUM

James F. Woodward

Some misprints occurred in our paper: "Making the universe safe for historians: Time travel and the laws of physics," *Found. Phys. Lett.* **8**, 1-39 (1995).

In line 6 of page 18, $\mathbf{f} = \mathbf{f}/m_o$ should read $\mathbf{f} = \mathbf{f}/m_o$, and Eq. (4.6) should read:

$$\mathbf{F} = \mathbf{F}/m_o = -[(c/m_o)(\partial m_o/\partial t), \mathbf{f}].$$

Thereafter, all bold upper and lower case f's should be bold italic (indicating field strengths as opposed to forces).
