Book review

L'ACTUALITE RHUMATOLOGIQUE 1991 PRESENTEE AU PRATICIEN.

Les médecins du Centre Viggo Petersen et de la Clinique Rhumatologique de l'Hôpital Bichat, sous la direction de S. de Sèze, A. Ryckewaert, M.-F. Kahn, D. Kuntz, A. Dryll, Cl. Guérin. 1991, pp 440, FF 430, 18 × 23 cm, Expansion Scientifique Française,

For the 28th time the yearly volume of "L'actualité rhumatologique" comes off the press. It is a custom to bring together an updating of a number of topics of interest for rheumatologists in the field. The list of the topics is too long to be reproduced here, but the following broad chapters are dealt with:

1. Rhumatismes inflammatoires et connectivites.

2. Pathologie ostéo-articulaire, neurologique et vertébrale.
3. Métabolisme phosphocalcique.
4. Moyens d'exploration.
5. Biologie et physiopathologie.
6. Thérapeutiques médicales et leurs complications.
7. Chirurgie du rhumatisme.

The papers are critical overviews of the literature with extensive references and many illustrations. This yearbook is to be recommended to all rheumatologists adept in the French language. It will give them new insights in rheumatology and will also serve as a reference book for consultation when special problems occur.
