ERRATUM

The December editorial "A Cry From the Deep," by Sherman Mellinkoff (*Amer J Digest Dis* 11:978, 1966), contained two typographical errors.

On page 978, the eighth line from the bottom: substitute "patient" for "intern"; on page 979, the eighth line from the top: substitute "adrenal" for "other."

The corrected lines should read as follows:

all is well; and (14) if he (the patient) believes the latter under those circumstances or adrenal steroids can actually *cause* bleeding in susceptible people like you
