Erratum

In the paper "The Use of Methylthioadenosine Phosphorylase Activity to Select for Human Chromosome 9 in Interspecies and Intraspecies Hybrid Cells," by B.W. Porterfield et al. (1993), *Somatic Cell and Molecular Genetics*, Vol. 19, No. 5, pp. 469–477, the concentrations of azaserine and 5'-methylthioadenosine are given erroneously in $\mu\text{M}/\text{ml}$. They should be expressed simply as micromolar concentrations ($\mu\text{M}/\text{liter}$).
