Erratum

C. D. Mayee & S. Sarkar, An enhanced multiplication of potato virus X is not related to a synergistic reaction between the potato viruses X and Y. *Potato Research* 25 (1982) 343–346.

Table 2 has erroneously been omitted. The 11th line of page 345 should refer to Table 2, not to Table 1. Table 2 is given below.

Table 2. Effect of potato virus Y on the number of local lesions produced by potato virus X on *Gomphrena globosa*.

Source of infective sap from	Treatment	PVX lesions ¹ per leaf of test plant in experiment				
		1	2	3	4	5
Ulla	PVX	66	38	28	31	39
	PVX + PVY	122	77	46	56	60
Franzi	PVX	58	93	82	79	51
	PVX + PVY	0	2	2	0	0

¹ Average number of lesions from 12 pairs of leaves of *G. globosa*. Differences between PVX and PVX + PVY within a variety are significant at $P < 0.05$.
